We should also receive reports on the Passaic Valley Sewage Commission plant shut down, what is being done about the shut down, and the environmental impacts of the raw sewage being piped into our waterways.

Thanks,

Hi all

The next Passaic CAG Meeting is Thursday, December 6 at 6:00 PM at St. James Church, corner of Elm and Madison.

This meeting will focus on the CPG proposal for cleanup. The CPG team will provide a presentation and answer questions. We will then discuss the proposal with EPA reps to understand how it compares with what is currently being considered in the FFS, and how the overall decision process will consider this and other proposals that might be presented.

We have also asked for any updates and information that might be available as to the impact of Hurricane Sandy on the river conditions, contamination, and/or scouring.

The TASC technical support team has begun its support of the CAG and co-chairs have talked with them to discuss a path forward, we will share this at the meeting as well

Updates--

--The 90% design for RM 10.9 was delayed due to the hurricane and is now due on 11/30. We will likely not be able to discuss in any detail on 12/6 and will be planning our next meeting in Lyndhurst after the new year to discuss this.

--The CAG did submit its letter to the NRRB.

Please let me know if you have any questions, the summary of the last meeting is attached and all presentations are posted at ourpassaic.org as always

thanks

Doug
